How to look up your power point scores:

1. Look up your name under "Times/Time Standards" under USA swimming tools. Select "individual times" and look up your name. This will give you an overview of your events and highest scores. However, the actual point total may be different depending on your competition age.
2. You must use the power point calculator here to look up the **power point score for that event at the highest competition age for the age group**. For example, if you are racing in the 11-12 age group you must use age 12 in the power point calculator for the score for that event no matter if you are 11 or 12.
3. The qualifying period is for events swum from 8/1/18 through 11/3/19. No matter when the time was swum the score you submit must be the one matched with the highest age in the age group you will enter at the meet (**Age as of 1/4/20**).
