House of Delegates Report 2010
National Times Verification Committee
Submitted by Kirk Nissley (Chair)

The makeup of the Committee is defined in the Bylaws:

> **NTV COMMITTEE** - The members of the NTV Committee shall consist of the NTV Chair and the NTV/SWIMS Tabulator who shall be a staff member of the MS Office.

The duties of the Committee are also defined in the Bylaws:

> **NTV COMMITTEE** – The NTV Committee is authorized and obligated to fulfill the following responsibilities:
> **1)** issue to USA Swimming a timely annual listing of meets in the State of Michigan which, upon proper application, will be OBSERVED by MS/USA Swimming certified officials;
> **2)** insure that MS is in compliance with all NTV procedures provided by USA Swimming; and
> **3)** insure that official times from Sanctioned, Approved and Observed meets swum in the State of Michigan are entered into the SWIMS database.

Jan Cartmill and myself have been the committee since the inception of the NTV and SWIMS procedures by USA Swimming circa 2004-5. Although the NTV Committee is focused on the area of "Observed Meets", the responsibilities overlap with the SWIMS, TSO and NCAA Databases, On Line Meet Entry (OME), the LSC "Portal" and its uses with Records and Top 10 recognition.

Insofar as Observed (non USA) meets, the LSC Observed 16 total NCAA and High School State Championship meets. These top level meets had MS Officials in attendance and thus these achieved times were considered to be USA "official" and thus could be uploaded to the SWIMS database for their use for other top level USA meets.

All in all it was a typical year and things went smoothly. As per usual, the LSC is very lucky to have Jan Cartmills expertise and motivation with the databases. The yearly USA Statistics show that the Michgan LSC is always leading the country in the timely and accurate processing of the SWIMS Database requirements.

If anyone has any questions about how the NTV Committee works, feel free to contact Jan or myself.
