FIT AND CARE

Lycra® is a delicate fabric. It is this very feature which allows for the sleek, low-drag fit desired in a competition suit. As with any high-performance product, your proper care will prolong the usable life of this product.

FITTING: Lycra® suits should fit snugly and should not be purchased one size up for growth. Loose fitting swimwear does not wear as well as those fitting close to the body. Take gentle care when putting on your suit. Do not pull hard on the suit and be careful your fingers do not break the elastic. Once the material of your suit begins to relax, it will go on with greater ease.

WASHING: DO NOT MACHINE WASH YOUR SUIT. Remember to rinse your suit thoroughly in clear, cold, fresh water after each wearing to remove chlorine and perspiration. Hang your suit to drip dry. Do not put it in a pocket or roll it in a towel. Leaving your suit in such a condition results in a very rapid degradation of the Lycra® yarn. Shampoo and soap both contain detergents and will cause the color to fade and the Lycra® to break down.

Rest assured, you have selected a suit made from the highest quality materials on the market today. Nevertheless, Lycra® fabric has a limited usable life which is greatly affected by the individual's care and general pool conditions. DURAFast® styles are constructed of 100% Polyester blend for extra durability in withstanding repeated exposure to chlorinated water. With proper care, you will enjoy thousands of yards in your new suit.
