Hello Schroeder Families!

We wanted to reach out and break it down how it will look and operate. We are running with a very minimal footprint. At this time, there will be no spectators, but hopefully the webcast will work well!

When you are NOT racing:

You will be outside the building spread out at least 6 feet a part and masked (parents are more than welcome to be outside as well!). THIS WILL BE ADHERED TO OR YOU WILL BE DISQUALIFIED FROM THE COMPETITION.

We will have staff and our wonderful volunteers monitoring this but parents please help and athletes please be compliant. Please do not retreat to shared vehicles.

Bring SHADE, lawn chairs, towels, sun glasses, whatever you need to stay comfortable. What you do with regard to fast suits is up to you but the locker rooms are not available for changing. If you have to use the restrooms, please let us know and it's the same procedures as regular training.

The meet will be live streamed on YouTube Live on two channels.

THIS channel will have the race footage.

THIS channel will have the event and heat numbers.

You will need to pay attention to where we are at in the meet.

Our wonderful volunteers will help organize the heats outside.

When you are racing:

You will enter the building from the Southwest doors (the far doors on the Scoreboard side).

You will enter with Lane 8 (or whatever the farthest lane is) leading the way. Then Lane 7, 6, etc, etc.

You will still be masked and you may bring in a bag with a towel.

You will be staged where we get changed on the North end side of the pool.

When the heat before you dives in and the previous heat is masked and on their way, you will bring your bag behind your lane, unmask and begin the Battle Behind the Blocks.

When you finish your race, you will stay in the water. We will do fly-over starts.

After the next heat begins, dry your face, mask-on and proceed to the exit

We are going to take this slow and safe!

It will be fun racing again, but we MUST make safety our number one priority. So please, follow these procedures and if others are not, please remind them.

I'm sure we will find ways to improve this both from the athlete perspective and parent perspective.

50s Long Course

After you finish you get out of the pool and walk down the EAST side of the pool (where we enter the building and get changed before practices). Remember to stay at least 6 feet a part.

You will stay staged on the orange pieces of tape until the heat after you is in the water (staying at least 6 feet a part). You will dry your face, put your mask on and leave through the NORTHWEST doors (the doors that are closest to the YMCA entrance and the pull-up bars).
