

TIBU MASK PROTOCOL UPDATE

Hydro-Sonic Tiburones will be updating the Mask Protocol starting this weekend. While all swimmers have been very diligent about wearing their masks into facilities we will now require all athletes to wear their masks up until they reach the edge of the pool. With the recent executive order there will be a higher level of scrutiny for all programs that obtained a youth athletics restrictions waiver.

While the state of Maryland has recently downgraded swimming to a "Low Risk Activity" and there have been no known cases of COVID-19 being spread at aquatic facilities, we want to ensure that our swimmers are able to continue training without interruption.

Starting 12/19/20:

- Swimmers will continue the regular health check prior to practice (temp. check)
- Swimmers will be required to wear Masks to pools edge
- Swimmers will need a **Ziploc bag (with their name)**
- Swimmers will place mask in Ziploc bag and leave it at the edge of their lane or inside their equipment bag.
- Masks **must be** replaced as soon as swimmers exit the water

It is advisable that swimmers have multiple masks in the event that one gets soaking wet
