

Site Registration Policy

Evaluation

All potential new members must be evaluated for practice group placement. Evaluations are held at the beginning of the short-course (August) and long-course (April) seasons, or by appointment when outside of these times.

Returning members will register for the appropriate practice group as directed by their coach.

Registration Options

Steel City Aquatics has two seasons each year. The Short Course season runs from the beginning of September through March with competitions in short course (typically 25 yard) pools. The Long Course season runs from April through the end of July/beginning of August with competitions in long course (50 meter) pools. Swimmers may register with Steel City Aquatics for the short course season, the long course season, or annually for both seasons. Payment amounts will be outlined on the website. Discounts apply to those that register with an annual membership.

If someone decides to register after one of the seasons has started, then they shall register at a prorated fee based upon their practice start date.

Site Specific Registration

Steel City Aquatics is a multi-site location. It is recommended that new swimmers register with the site that has a pool facility closest to them. However, swimmers may choose to sign up for any location as long as it is done during the regular registration timeline. When a location has garnered a maximum number of swimmers based on pool space, or if someone registers outside of the normal timeline, they may be directed by Steel City Aquatics Registrar to a location based on current occupancy levels. There is no absolute guarantee that swimmers will be able to register with their closest location, so registering early is recommended.

Registration Location Practice Rules

All athletes will be required to follow their specific site schedule for the location to which they registered. When the opportunity arises, athletes may be directed to other locations for practices by their head coach. If you have a scheduling conflict, a request to practice at an alternate site location can be submitted to the athlete's home site head coach via e-mail within 48 hours of the requested date.
