# Swim Neptune

---

## Vision

At its core, Swim Neptune is about one thing and one thing only: teaching kids how to succeed in life - through sports. Swim Neptune is not ultimately about winning meets. Or winning championships. Or being the biggest swim team in Arizona. Or about getting your kid a college scholarship. If and when those things come to pass, they measure how well we are doing against our true goal. Swim Neptune is about the kids, and about how successful we can help them be.

## Success through fun

At the team's functional core, we improve stroke technique, increase speed and endurance, and build individual character. These elements lead to faster, more efficient swimming. Just as importantly, they open the door to more enjoyment, fun and possibility.

## A successful future

Swimming programs often underestimate the need for the positive consequences the sport adds to the process of individual character building, but for Swim Neptune individual skills and work done in the pool are key elements for developing values and character growth.

Our goal for Swim Neptune swimmers is to carry principles of commitment, dedication, teamwork, delayed gratification, sportsmanship, and a willingness to work toward a long team goal out of the pool and into every facet of their life, most notably the classroom, in their families and in their community.
