

Cascade Swim Club

Document: JOW Family Account Policy & Procedures – COVID-19 Provincial shutdown and Training Interruption procedures

Application: These procedures apply to all family accounts for all JOW families:

Junior Olympic Way

Cascade Swim Club COVID Provincial shutdown and Positive Case procedures

Purpose:

The purpose of this document is to deal with the scenarios of both provincial economic shutdown (much like the scenario we experienced in the spring of 2020) and scenarios of a positive COVID test result inside the organization.

Pre Amble:

Notwithstanding that different facilities have different COVID protocols and procedures that Cascade Swim Club would need to adhere to, and that ultimately we will take direction from AHS - the following are in place for the Cascade competitive and Junior Olympic Way programs for the 2020-2021 season.

Procedures (Full Provincial/Municipal Shutdown):

In the unlikely scenario that Alberta moves to a full province-wide economic shutdown (our facilities are closed) the following would take place:

1. Within 7 days all training would move to remote dryland which would continue for up to 14 days.
2. Inside the 14-30 day window, if the shutdown continues, families would have their options communicated to them which would be either:
 - a. Continue with remote training as part of the club
 - b. Seek withdrawal. Remote training would continue as outlined until the 30 day mark.
3. For a shutdown that lasts 30 days or longer families who have chosen to continue to train remotely will be provided with a schedule for remote training. Families who elect to withdraw will be provided with a prorated refund and will discontinue training. This prorated withdrawal will be based on a September to end of June season (or portion thereof for those starting in January or in April of 2021) and time in directed training based on the month of the program ending. This will fall under our temporary COVID Withdrawal and Provincial Shutdown policy.

The ongoing shutdown scenario will be reviewed by the Cascade staff and Executive committee that will decide further steps past this point.

Individual Positive Test Results

If a swimmer tests positive per AHS guidelines they will be unable to train for the AHS directed period of time in which they are isolated - typically 14 days. The swimmer will then receive remote dryland training as directed by a Cascade coach during that period of time. The directed training will consist of both "remote" and "online" (Zoom) training. Families will not be reimbursed any fees in this scenario. If an individual's illness persists past 30 days they can apply to the Cascade exceptions committee vis-a-vis our critical illness policy.

If a positive test inside of the cohort results in the "lane" or "group" of swimmers having to isolate or be tested the affected swimmers will receive directed remote training from an assigned coach as per above. There will be no refund of fees for this period of time in which the swimmers are not at the pool.

If a complete cohort has to isolate or be tested as per AHS direction then remote training will begin immediately with the group's coaches. If there is a possibility of any realized savings due to an entire cohort being removed the club will refund these realized savings back to the affected families.
