

2022 COVID-19 GUIDELINES (visiting clubs)

The KEY points to successfully gain entry to the Canada Games Aquatic Centre (CGAC):

- Proof of vaccination or medical exemption (if applicable) for all individuals - government QR code required
- government-issued ID
- successful facility screening
- face mask at all times

Vaccination Proof

By Middlesex-London Health Unit (MLHU) Section 22 orders (Nov 1, 2021), all individuals 12 years of age or older are required to show proof of full vaccination or medical exemption by providing their government QR code upon entrance to the Canada Games Aquatic Centre (CGAC). This applies to all individuals entering the building regardless of activity. Swimmer's born in 2010 have 8 weeks from their 12th birthday to show proof of full vaccination, if they are not already fully vaccinated.

Facemasks

Every person in CGAC must remain masked at all times, except when swimming. 3-ply medical facemasks are strongly encouraged.

Spectators

CGAC has facility limit of 400 spectators for this event. We are asking families to please observe a "one spectator per swimmer" recommendation. While this is a recommendation only, we are in, fairness to all families, respectfully asking for everyone's cooperation and compliance in this regard.

Entry & Exit

Only swimmers participating in the scheduled session will be permitted access to CGAC. All swimmers and coaches, senior officials and safety officials will enter first, followed by all officials, through the front entrance. Spectators will enter CGAC last, through the rear entrance when warm-up commences. There will be no "in-out" privileges – once individuals gain entry to CGAC they will remain inside until they are finished their session. Every individual will need to complete the intake process every time they enter CGAC (parents with swimmers in multiple sessions take note.) All session participants, whether swimmer, official, or spectator, will exit CGAC through the doors that they entered. Spectators (parents) are asked to leave CGAC at the conclusion of their swimmer's last event and wait outside at a meeting place they have preorganized with their swimmer.

Screening

Everyone entering CGAC will be screened for health and contact tracing. This can be done using the QR coded sign at each entrance. Once the online screen is completed, each individual will then proceed to the screener and show the completed screen with City of London logo and the date of the event. Everyone will then show proof of vaccination (QR code) and personal ID that matches the vaccination passport. If individuals do not use the QR coded sign for screening, they will have to complete a verbal screening. This is for every person 12 or over – swimmers and coaches, followed by officials, followed by spectators – for every session of the competition.

Swimmer & Spectator Seating

Upon successful entry: swimmers will proceed to their team's designated seating area, officials will proceed to the designated officials meeting space, and spectators will proceed to the spectator seating area. If required, the ground level mezzanine near the front entrance, overlooking the deep end, will be used for swimmer seating at the completion of their events while they wait to leave CGAC. This area will not be available to spectators.
