

Competitive Template - UPDATED April 17th, 2022

The following table outlines the remaining list of competitions available to swimmers in the 2021-2022 competitive calendar.

Please note that several meets including Swim Ontario championships have qualifying standards. This includes Swim Ontario Spring Forward Invitational, Swim Ontario Festival, Swim Ontario Youth and Junior (OYJ) and Ontario Swimming Championships (OSC). For the 2022 season, the head coach has elected to waive national meets due to financial constraints.

We recommend you consult with your swimmers coach to determine what events are suitable for your swimmer.

BLUE/ORANGE are local, intersquad meets that are one day only, have one session and swimmers swim a limited number of events.

DUAL MEETS can be local or away, have two to four sessions, and include an expanded number of events and swimmers. Team scoring is accumulated over the session to determine an overall winner for the meet.

INVITATIONAL meets are hosted in other locations and venues (Markham, Barrie, Nepean). Invitational meets are typically held over 2-3 days, have up to six sessions and provide preliminary and finals.

CHAMPIONSHIP meets are regional, provincial and national level. All levels are subject to qualification standards that are published in six to eight months in advance of the competition. Swimmers and coaches are required to verify their times via the SNC database of performances. It is anticipated that championship meets will provide team scoring, medals and high point awards. In addition, swimmers are expected to attend multiple sessions, have the opportunity to swim in events they are not qualified for and attend finals if they are qualified.

Expectations for meets within the competitive calendar are dependent on the level your swimmer is registered for:

1. AG 1- Devos

These swimmers are the least experienced racers and as such should be selective in the number of competitions they participate in for the season. In general, BLUE/ORANGE, DUAL meets and six invitational meets per year is recommended.

2. AG 2- Train

AG 2 Train swimmers are building their swimming and racing skills and have a better understanding of the range of events and strokes that they are competent in. These swimmers will have a willingness to try swimming multiple events over multiple sessions.

Recommendation for this level of swimmer is BLUE/ORANGE, DUAL meets, seven invitational meets.

3. AG 3 Race

AG 3 Race swimmers have advanced skills, greater level of maturity and can achieve multiple performances over a series of sessions. Recommendation for this level of swimmer is BLUE/ORANGE, DUAL meets, eight to nine invitational meets. These swimmers are expected to attend championship meets including regional and provincial competitions.

4. JR Performance

JR performance swimmers have experience, advanced skills, recovery hygiene and physical capabilities to compete over multiple days, multiple sessions and multiple events. These swimmers are expected to attend championship meets including regional and provincial competitions.

5. Sr Elite

SR Elite swimmers have the greatest potential to attend the full spectrum of competitions. This includes BLUE/ORANGE, DUAL meets, eight to nine invitationals, and championship meets (including four day competitions). These swimmers are expected to attend championship meets including regional and provincial competitions.

Date	Event	Location	Groups	Qualifications	Notes
April 30th- May 1st	2022 BTSC Spring Off The Blocks	Barrie	AG Devos - SR Elite	No standards	Meet deadline April 25th

Please note that all events assume continued improvement in the public health restrictions. Coaches will indicate to swimmers in advance of registration deadlines if they should be considering attending a meet, or if the meets are on successive weekends, which meet is priority.

A reminder that all meets are at an additional cost. Programming fees are for coaching and training only. Whenever possible, coaches will be canceling weekend training sessions when we are attending swim meets. This is meant to minimize costs to membership, however is not always possible for some meets that have fewer members attending (e.g. qualification times, etc.).
