

Gold 11 Community Clean Up

May 29, 2019

On Monday, May 13th the Gold 11 squad followed up their practice with a community clean up. With gloves on and garbage bags in hand they hit the trails along the river near Shouldice Pool. The weather was sunny and warm, and the attitudes of the swimmers matched the great conditions. The group had rescheduled the original date due to the surprise snow storm the week before. Everyone was positive and excited, and as one might expect from the Gold 11 squad, it quickly turned into a competition between some of the athletes!

The Gold 11 squad said that it was great to interact with community members while making a difference in the local community. One passerby commented on “what a great group you have -

so happy about doing something that many people would not be willing to do” – and the Gold 11 crew couldn’t agree more!
