**BABY/ME: HYPONATREMIA:** NO more than 5 times/5 seconds submersions within a 24-hour period, when child is not yet controlling their breathing. Infants will drink the water. Too much consumed water is extremely dangerous, convulsions & death are possible, we need to be conservative & follow this "no more than 5 for 5 rules". The GOAL of the infant class is to promote a positive response to the water environment, to teach the infant to swim and float on their back and get a breath of air. The emphasis is on water adaptation and on training the child to react in a constructive manner should they find themselves accidentally in the water. We are not a survival swim program.
