

2023 Registration Information Clubs (Black – Loren’s questions/Blue - USA-S answers)

1. Credit card information – will it be stored? Some clubs pay for their non-athletes and would like not to have to reimburse them but rather use a club credit card. Alas they do not want that credit card information stored under all of the non-athlete accounts and possible athlete accounts for cash paying athletes. **No, credit card information will not be stored.**
2. Transfers – will we still be able to collect a fee for this? **Yes, you can but it will be up to the LSCs to collect them. It will not be done in SWIMS 3.0.** I just watched Eric’s video and it said that it stated at the beginning that you needed to be a registrar to initiate it but then later he said the parent could initiate it. I did see where the registrar would approve. **Parents or myself can initiate a transfer. The LSC registrar has to approve them.**
3. Athlete choices available – if a club offers Seasonal, Premium, Flex, and Outreach, I know that Outreach will be a separate link that to be sent out after the club and LSC approve but what about Seasonal or Flex? Can the club also get separate links for those to only have those options available to the athletes the club wants to register as Flex and Seasonal. Can seasonal be not offered in the Fall/Winter but added to the clubs offerings in the Summer? ~~Each club will set up their registration offerings at the beginning of the membership year. Once they are set, they cannot be changed during that membership year.~~ **7/12/22 – This is now under review by USA-S 8/22/2022 Clubs may now change their offerings throughout the year**
