

# Swimsuit Measuring

## Measuring: Easy as 1-2-3-4

1. **Bust:** You'll want to measure around the fullest part of the bust.
2. **Waist:** Bend to one side to identify your natural waistline. Mark it with your finger. Now straighten up and measure around the waistline, keeping tape snug.
3. **Hips:** Measure just below the widest point of your hips, right under the hip bone. Round down if measurement is between sizes to the nearest whole number.
4. **Torso:** Measure the torso by holding the tape measure at the top of the shoulder. Wrap the tape down and across your back, at a diagonal. Then wrap the tape measure between your legs and back up the front of your body, meeting the beginning of the tape at the same shoulder.

TIP – Because every body is unique, individual measurements will not match the charts exactly. Round your measurements to the closest size, keeping in mind your personal feelings of comfort. Women's suits and men's racing suits, especially, will stretch a bit. Hip, waist, and chest sizes should be rounded down for a snug fit. Torso measurements, on the other hand, should be rounded up. A too-snug fit in the torso could result in sore shoulders or sore groin muscles.

# FINIS Female Hydrospeed 2 Bladeback Performance Suit

Aloha Aquatics Member Price: \$63.00

The Female Hydrospeed 2 Bladeback is a competitive racing suit designed with iso-panel compression and a hollow-core Scalex fabric. By supporting targeted muscle groups, the Female Hydrospeed 2 Bladeback lets athletes perform at the highest level of competition. The advanced lightweight Scalex structure compresses against the body while whisking away water from the surface. Flat-Lock stitching and durable fabric make the Female Hydrospeed 2 Bladeback last longer than other similar racing suits on the market. The Female Hydrospeed 2 Bladeback is a competitive cut with an open back, providing coverage from the neck to waist. Available in sizes 24-36. Fina Approved.

- **Iso-Panel Compression** - Supports targeted muscle groups so that you can perform at the highest level of competition
- **Hollow-Core Scalex Material** - Advanced lightweight structure compresses body and whisks away water
- **Durable Flat-Lock Stitching** - Longer lifetime than other racing suits on the market
- **Competition Bladeback Cut** - Open back design provides coverage from neck to waist
- **Multiple Sizes** - Available in Sizes 24-36.
- **Fina Approved**

# FINIS Female Hydrospeed VELO Race John Performance Suit

Aloha Aquatics Member Price: \$210.00

One of the least permeable suits on the market, the Hydrospeed Velo is FINIS' premier technical swimsuit. The Hydrospeed Velo uses the newest smart compression racing technology that supports muscles, reduces lactic acid levels and heighten nerve senses. The Hydrospeed Velo includes a revolutionary blend of fabric that merges high compression panel construction with a lightweight feel. The advanced suit technology provides superior friction reduction in the water, limiting resistance against the body. Laser cut fabric and tapered edges creates smooth seams and secure grip around the legs and shoulders. The Hydrospeed Velo has a unique structure design around the pelvis area providing a custom fit for increased support and compression to vital core muscles.

- **4-Way Stretch Fabric** - Provides perfect compression around the muscles and body
- **Welded Seamless Technology** - Create a seamless structure around the suit and reduces drag friction
- **Italian Calendared Fabric** - Technical heating process produces an ultra smooth and lightweight surface
- **Minimal Permeability** - The permeability value of our fabric is at the legal limit as set by FINA
- **High Compression Panels** - .Support the muscles, reduces lactic acid levels and heightens nerve senses
- **Blended Materials** - Superior friction reduction limiting resistance on the body
- **Panel Construction** - Allowing compression and freedom where you need it most
- **Laser Cut Fabric** - Creates a smooth edge that lays flat and firm against the body
- **Taped Edges** - .Creates a secure grip against the shoulders or legs
- **Pelvic Support Area** - Unique structure design around the pelvis area provides a custom fit for increased support and compression to vital core muscles
- **Size down for a competition fit**
- Drawstring bag included with purchase
