

Webmaster Report
Montana Swimming, Spring 2014 HOD Meeting
Submitted by John Heryla

May 2014

I believe that the time has come for a change in the way Montana Swimming handles its website. I took the job of webmaster at a time when it required the skills of a computer savvy person who was versed in HTML to design and maintain a website.

With the implementation of our TeamUnify website, it no longer requires any special skill to maintain this website.

Therefore I propose that we diversify the task of updating our website, relegating the maintenance of individual areas of the website to various person charged with that specific task. For example, the Records Chair can be given webmaster access and charged with updating the MT records pages. The Coach representative can be charged with maintaining the coach web page(s), and the Official Chair(s) could be given the responsibility of updating their own web pages. The HOD Secretary can be trusted to maintain the HOD pages, as well as the Montana contact information.

The basis of this web site (TU) is an "idiot-proof" interface that requires no special skill, therefore I believe it is time for Montana Swimming to eliminate the position of Webmaster, in favor of a number of people helping to maintain the MT swimming website.
