Subject: FHCC - Coronavirus Safety Precautions

Dear Members,

As more cases of COVID-19 (the novel coronavirus disease) are confirmed in the U.S., we want to assure you that Fremont Hills Country Club is taking action to prevent potential exposure to the virus. We are also working to ensure that members & staff remain informed regarding this growing threat.

Here are some of the key steps that the we're taking:

- We have implemented **enhanced routine environmental cleaning procedures** throughout the Club. This includes disinfecting door handles & surfaces that members regularly come in contact with.
- Employees are being **reminded of the importance of proper hand hygiene**, covering the nose & mouth when coughing or sneezing, and avoiding touching the face.
- Employees are prohibited from coming to the Club while sick with any infectious illness and **we are asking the same of members as well.**
- We are requiring employees who have traveled abroad to heavily infected areas of the country to **work from home for two weeks after returning**, to ensure that they have not come in contact with the virus. We are also asking members who have traveled abroad or to heavily infected areas of the country to **not return to the Club for 2 weeks.**

Fremont Hills Country Club is developing a protocol to be followed in the event that a member, guest, or employee is diagnosed with COVID-19. This may include closing some or all Club operations.

While there are no known cases of COVID-19 in connection to the Club, the Centers for Disease Control and Prevention (CDC) recommends that all businesses take precautionary measures and prepare in case there are

more widespread community outbreaks. The safety of our members, guests, and staff is our top priority while taking steps to enable members to continue to enjoy the Club.

Respectfully,
Fremont Hills CC Management Team

COVID-19
How is it prevented?

- 
Wash hands often
- 
Avoid touching eyes, nose, or mouth with unwashed hands
- 
Avoid contact with sick people
- 
Stay home while you are sick; avoid others
- 
Cover mouth/nose with a tissue or sleeve when coughing or sneezing
