

Jonathan Fingerut

My name is Jonathan Fingerut, I am a biology professor at Saint Joe's, and my family has belonged to KSC since 2015. My two sons are enthusiastic members of the swim team (GO KRAKEN!) and can be found most evenings playing "flag ball" or asking the guards for free swim in the dive well. During these eight years I have been a frequent volunteer (even being awarded the coveted "golden stopwatch" award for my service to the swim team) and have seen firsthand what goes into making a successful club experience for our members. I have been involved in the collaborative management of organizations of many sizes and I am excited by the opportunity to bring my experience and ideas to make this wonderful club even better. In particular, I would like to help improve communication with the membership, and enhance and bring on new amenities (e.g., snack bar, wifi, games) to make everyone's time at the pool more fun and productive. I hope you will provide me the opportunity to work towards these goals. Thank you for your consideration.
