Proposed bylaw or policy section and language:

I propose having all collegiate swimmers, regardless of age, swim in the 20-over non-scoring age group.

Current bylaw or policy section and language:

The point-scoring age groups shall be 8-under, 9-10, 11-12, 13-14, 15-16 and 17-19. There shall also be a non-scoring 20-Over age group.

Proposal template:

9.10 Age Groups
The point-scoring age groups shall be 8-under, 9-10, 11-12, 13-14, 15-16 and 17-19. There shall also be a non-scoring 20-Over age group. Swimmers who are, or formerly were, a member of a college team are not eligible to score points. They will compete in the 20-over non-scoring age group.

Rationale:

- 19-year-old collegiate swimmers have been competing in the 17-19 age group, when the age group is intended solely for high school students who have not yet gone to college.
- The collegiate swimmers will still be able to compete but they will not be able to score points for the team they are competing with.
- Collegiate athletes have experienced a different style of training than club swimmers.
