

## **Air Quality Index Practice Adjustments**

Due to the recent fires in Northern California, staff will monitor the Air Quality in Fairfield and American Canyon. Our priority is to maintain a safe and healthy practice environment for our swimmers and staff.

***DART-Solano uses the following two websites to determine the acceptable AQI.***

[AirNOW.gov](http://AirNOW.gov)

[IQAir](http://IQAir)

Practices will be cancelled if the AQI reaches 150 or over.

Practices may be modified if the AQI is between 100 and 149.

-Swimmers with a history of respiratory disease such as asthma/heart disease may want to limit any outdoor activities if the AQI is over 100.

### **Updates and/or cancellations**

The staff will send out updates via email in the event of a cancellation. Our goal is to send emails and SMS messages NO LATER than 2 pm regarding any cancellations.

Our social media will also be updated

Text messages will be sent to all families who have an active SMS on Team Unify. Families are encouraged to activate their SMS in our system for any last minute updates.

### **Solano College and Phillip West Aquatics Center**

Management at each location will ultimately make the determination if the facility will be closed for outside use. Our coaching staff stays in communication with these facilities for updates.
