

Covid-19 Response and Communication Policy

Policy Statement

Sienna Premier Aquatics (SPA) is committed to the safety and protection of our athletes. We understand that when returning to practice swimmers will be choosing to gather with other swimmers and coaches at the pool and take any risks associated with going to practice.

Policy Objectives

1. Establish team guidelines around the response to any positive test of Covid-19 by any swimmer or family member once we return to practice.
2. Outline the process we will follow in communicating with SPA families in the event of a positive test.

General Content

As part of the SPA Reopening Plan, we have asked to be informed immediately if any SPA swimmer or family member tests positive for Covid-19. Upon receiving news of a positive test, SPA will execute the following steps to communicate with our membership.

1. SPA will immediately notify via email all members of the affected swimmers practice group to notify them of the test result. Content of this notification will not include the affected swimmer's or family member's name and will differ if a swimmer has tested positive or if it is a family member. Members of the affected group will not practice for 14 days, and will be asked to self-quarantine. The coach of the group will not work for 14 days, and will be asked to self-quarantine.
2. SPA will notify all SPA families of the test result, the group affected and whether or not there has been any other group coached by the same coach or if there are any other groups with siblings in the group.

This process will be repeated for every positive test, even if the group affected has already be notified of a different test result.
