

This has been another year with a lot of records including several World Records in both Long Course and Short Course meter pools by Ryan Lochte as well as US Open records in yards..

Ryan Murphy set 3 NAG records in the 11-12 boys LC, while Sarasota YMCA lowered the 400m Medley Relay record.

In yards, Nicholas Caldwell, GCST, lowered the NAG record in the 1000yd Free for 13-14 boys.

USA Swimming has new feature on their web site that helps out with keeping track of records: <http://www.usaswimming.org/FL.lsc> this is not a replacement for sending in the records reports to the Florida Swimming office or to me.

On the USA Swimming address it will be possible to create record reports and Hy-Tek files. These records are updated 1-2 times/month.

Below is a summary for the number of events by age group where records have been broken. This is not the same as the number of records established during the year since several records have been lowered multiple times:
