Joan,

Risk Management is exploring the possibility of providing workers compensation insurance(WC) to the LSCs. From time to time we get a question if WC is provided to an LSC or a request for a WC certificate of insurance. Since workers compensation insurance is not provided by USA Swimming, then the LSC usually has to purchase an individual policy through a state fund which is very expensive.

The possibility of a group purchase could save some dollars and allow USA Swimming to explore absorbing the expense. If we could get the attached information from each LSC, I would be glad to explore the possibility. It may be that there are not enough "employees" for an individual LSC to purchase a policy but we want to explore the possibility of a policy protecting all LSCs, especially from a regulatory standpoint where there is a mandatory requirement to purchase WC insurance. Please forward to the LSCs and permanent offices. Thanks.
