

New!

Education to support Swim Lesson and Swim Team Programs

This is your opportunity to be one of the first to earn a Certificate of Training in working with children with challenges in an aquatic setting.

This ground-breaking training integrates the latest techniques for working with children enrolled in swim team or lesson programs who have cognitive or physical challenges.

Participants can choose the level of training which best suites their need:

1. The Children With Challenges™ (CWC) Online Educational Course as a stand-alone course for a general introduction to programming for children with challenges, or
2. A more in-depth learning experience through participation in both the CWC online course and CWC Workshop. *Note, the CWC online course is a pre-requisite for registration in the CWC Workshop.*

A CWC certificate does not earn credit toward an academic degree, but it shows you and others that you have the desire to learn and grow your capabilities.

Online Educational Course

Target Audience: Aquatics Management, Swim Instructor, Swim Coach

*Cost: \$50/person**

This ground-breaking training integrates the latest information for working with children enrolled in your swim team or lesson program who have these challenges:

- Physical/Orthopedic
- Intellectual/Cognitive
- Developmental Delay
- Emotional/Behavioral
- Learning and Processing
- Sensory Challenges
- Other Health Challenges

Upon successful completion of the online course and exam, participants are awarded a printable Knowledge Badge for their records.

To register for the Aquatics for Children With Challenges™ online educational course visit: <http://www.saielearning.org/store>

In-person Workshop

Target Audience: Aquatics Management, Swim Coach

*Cost: \$150/person**

Pre-requisite: CWC On-line Educational Course

The CWC Workshop is an opportunity to earn a Certificate of Training in working with children with challenges in a swim team or swim lesson setting, providing a more in-depth discovery of the online Children With Challenges course content.

This combined classroom/ in-water workshop builds upon the information in the online course, maximizing learning and providing tools and resources to be used right away, and for training ones' instructional or coaching staff. Guided discussion, experiential activities, networking, and the sharing of best practices amongst peers provides a forum for active participation.
