Open Water Report

April, 2014

1. Toronto 2015 Pan American Games. I will be traveling to Toronto 2015 two days prior to our UANA meetings. I will be meeting with numerous committees and groups as we get ready for the Toronto 2015. I will give a detailed report at our April 30, 2015 meeting. I have a serious concern with water temps.
2. International Technical Officials have been chosen for the Pan American Games. 19 nominations were received for six available positions.
3. Working to finalize an UANA Open Water calendar to post on our website. We are seeing a growth in competitions and prize money. Trying to get a better response from our Federations.
4. Looking forward to a new UANA President and the composition of a new Open Water Technical Committee. I would ask the zones to select people with a genuine love of open water. Only half of our present committee gives any feedback and represents the interests of their zones.
